

# Repository

- Stores **all types of research** outputs and data within a highly flexible system
- Supports Repository Managers with automatic metadata quality checks and **streamlined** administration tools
- Supports **multiple embargoes**
- Enables **comprehensive reporting** across the full publication lifecycle
- Showcases research via an integrated **public portal**
- Seamlessly synchronises with other systems including **ORCID and DOI**

#### Using this demo

### Access

#### Third party content

The output depends on the reproduction of third party content for which open access rights could not be granted (either within the specified timescales, or at all).

#### Publication embargo length

The publication concerned requires an embargo period that exceeds the stated maxima, and was the most appropriate publication for the output.

#### Publication disallows OA deposits

The publication concerned actively disallows open-access deposit in a repository, and was the most appropriate publication for the output.

### Deposit

#### No repository available

The individual whose output is being submitted to the REF was unable to secure the use of a repository at the point of acceptance.

#### Delay in securing peer-reviewed text

The individual whose output is being submitted to the REF experienced a delay in securing the final peer-reviewed text (for instance, where a paper has multiple authors).

**●** Bypass REF exception registration

Impact

Haplo  
Research Manager

- Haplo enables researchers to **record research impact** and submit supporting evidence
- **Links records** of impact to the underlying research project, funding, researcher, and research output
- Enables records of impact to be linked to **REF** Units of Assessment
- Reports on research impact throughout your institution
- Showcases your research impact and capability via a fully customisable **public portal**

“Haplo provides our academics with a single interface for Repository, PhD Management, Ethics, and more. The streamlined workflows, in particular, have resulted in significant buy-in. We’ve seen a huge increase in self-deposit of research outputs by academics as well as improved understanding of open access compliance.”

Jenny Evans  
University of Westminster
